STEP:3 NULL VALUES & SMALL DATASET HANDLING

↳ define small dataset.

* Career : < 10 matches.
* venue : < 5 matches
* innings : < 5 matches
* season : < 3 matches

↳ matchup score will have this step inbuilt.

↳ for this we have to use dataset outside of IPL.

Sunday Plan.

STEP

1: BBB to MBM ☐

2. Features Creation ☐

3. Handling Null values ☐

4. Model Training ☐

5. Test Data Generation ☐

6. Fetching Match Details. ☐

7. Prediction.

8. Optimisation

Additional Steps.

i) Dynamic Data Handling.

ii) Handling Small datasets.

iii) Matchup Score Calculation

iv) Classification Problem
